

CD19 (DM207) RABBIT MAB

货号: 28550

产品全名: CD19(DM207) 兔单克隆抗体

基因符号 CD19;B4;CVID3;MGC12802

描述: CD19 antibody(DM207) 兔单克隆抗体

背景: Lymphocytes proliferate and differentiate in response to various concentrations of different antigens. The ability of the B cell to respond in a specific; yet sensitive manner to the various antigens is achieved with the use of low-affinity antigen receptors. This gene encodes a cell surface molecule which assembles with the antigen receptor of B lymphocytes in order to decrease the threshold for antigen receptor-dependent stimulation.
