

CTNNB1(S37Y)

产品名称: CTNNB1(S37Y) 小鼠单抗

货号: 26296

基因符号: CTNNB1

描述: CTNNB1(S37Y) 小鼠单抗

背景: CTNNB1 protein is a dual function protein. It is a subunit of a complex of proteins that form adherent junctions, which are important for the establishment and maintenance of epithelial cell layers by regulating cell growth and adhesion between adjacent cells. CTNNB1 protein also pulls double duty as an intracellular signal transducer in the Wnt signaling pathway. Mutant CTNNB1 (β -catenin) has been implicated in the pathogenesis of several cancers including melanoma, colorectal cancer, hepatocellular carcinoma, and ovarian cancer. Mutations have been implicated in the pathogenesis of several cancers.

免疫原: A synthetic peptide from the internal region of CTNNB1 which includes the mutation of S37Y, human origin.

经过测试的应用: ELISA, WB, IHC

推荐稀释比: ELISA: 1:1000-1:5000 WB: 1:500-1:2000 IHC: 1:50-1:100

Concentration: 1mg/ml

种属反应性: Mouse

形式: Liquid

克隆性: Monoclonal

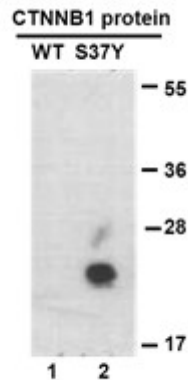

亚型: IgG

纯化: Purified from ascites

成分: PBS (without Mg^{2+} and Ca^{2+}), pH 7.4, 150 mM NaCl, 50% glycerol

种属反应性: Recognizes S37Y mutant, but not wild type CTNNB1 of vertebrates.

储存条件: Store at $-20^{\circ}C$. Avoid repeated freezing and thawing

蛋白质印迹: WB: anti-CTNNB1 (S37Y) mAb **Western blot analysis of recombinant CTNNB1 (S37Y) and wild type proteins.** Purified His-tagged CTNNB1 (S37Y) protein (lane 2) and corresponding wild type protein (lane 1) were blotted

with Anti-CTNNB1(S37Y) monoclonal antibody (货号:26296). **Immunofluorescence.** Immunofluorescence of cells expressing CTNNB1 proteins with Anti-CTNNB1 (S37Y) antibody. HEK 293T cells were transfected with pCDNA3-GFP-CTNNB1 (WT) (left column) or pCDNA3-GFP-CTNNB1 (S37Y) plasmid (right column); then fixed and stained with Anti-CTNNB1(S37Y) monoclonal antibody (货号:26296).
