

## CYNOMOLGUS CCL24 PROTEIN, HFC TAG

货号: 12116

产品全名: Cynomolgus CCL24 蛋白

规格: 10/50/100 µg

基因符号 CK-beta-6;Eotaxin-2;MPIF-2

目标蛋白: CCL24

**UNIPROT ID:** O00175

**描述:** Recombinant Cynomolgus CCL24 protein with C-terminal human Fc tag

**背景:** This gene belongs to the subfamily of small cytokine CC genes. Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes. The CC cytokines are proteins characterized by two adjacent cysteines. The cytokine encoded by this gene displays chemotactic activity on resting T lymphocytes, a minimal activity on neutrophils, and is negative on monocytes and activated T lymphocytes. This protein also has antimicrobial activity, displaying an antibacterial effect on *S. pneumoniae*, *S. aureus*, Non-typeable *H. influenzae*, and *P. aeruginosa*. Finally, the protein is a strong suppressor of colony formation by a multipotential hematopoietic progenitor cell line. [provided by RefSeq, Jul 2020]

**物种/宿主:** HEK293

**分子量:** The protein has a predicted molecular mass of 36.6 kDa after removal of the signal peptide. The apparent molecular mass of cCCL24-hFc is approximately 35-55 kDa due to glycosylation.

**分子特征:** CCL24(Val27-His119) hFc(Glu99-Ala330)

**纯化:** The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

**Formulation & Reconstitution:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

**储存和运输:** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
