描述: GLP1R Nanobody

背景: GLP-1R (Glucagon-like peptide 1 receptor, glucagon-like peptide-1 receptor) is a class B, G-protein-linked seven-transmembrane domain protein found in the pancreas, lung, heart, kidney, Expressed in the hypothalamus and stomach. It is a receptor for glucagon-like peptide, a regulator of insulin secretion from pancreatic beta cells. This product is a nanobody with high specificity and affinity for GLP1R. It recognizes the extracellular structural region of GLP1R and can be used in experiments such as GLP1R expression detection and immunoprecipitation. It is a good GLP1R detection tool.
