

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

HUMAN TPBG PROTEIN, HIS TAG

货号: 11232 产品全名: 人 TPBG 蛋白 规格: 10/50/100 μg 基因符号 5T4;5T4AG;M6P1;WAIF1 目标蛋白: 5T4

UNIPROT ID: Q13641

描述: Recombinant Human 5T4 Protein with C-terminal 6xHis tag

背景: This gene encodes a leucine-rich transmembrane glycoprotein that may be involved in cell adhesion. The encoded protein is an oncofetal antigen that is specific to trophoblast cells. In adults this protein is highly expressed in many tumor cells and is associated with poor clinical outcome in numerous cancers. Alternate splicing in the 5' UTR results in multiple transcript variants that encode the same protein.

物种/宿主: HEK293

分子量: The protein has a predicted molecular mass of 36.1 kDa after removal of the signal peptide.The apparent molecular mass of 5T4-His is approximately 55-70 kDa due to glycosylation.

分子特征: 5T4(Ser32-Ser355) 6×His tag

纯化: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

储存和运输:Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
