

## HUMAN BTLA PROTEIN, HIS TAG

货号: 11324

产品全名: 人 BTLA 蛋白

规格: 10/50/100 µg

基因符号 BTLA;CD272

目标蛋白: BTLA

**UNIPROT ID:** Q7Z6A9

**描述:** Recombinant human BTLA protein with C-terminal 6xHis tag

**背景:** This gene encodes a member of the immunoglobulin superfamily. The encoded protein contains a single immunoglobulin (Ig) domain and is a receptor that relays inhibitory signals to suppress the immune response. Alternative splicing results in multiple transcript variants. Polymorphisms in this gene have been associated with an increased risk of rheumatoid arthritis.

**物种/宿主:** HEK293

**分子量:** The protein has a predicted molecular mass of 14.6 kDa after removal of the signal peptide. The apparent molecular mass of Human-BTLA-His is approximately 25-35 kDa due to glycosylation.

**分子特征:** 人 BTLA(Lys31-Ser150) 6xHis tag

**纯化:** The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

**Formulation & Reconstitution:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization.

**储存和运输:** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
