

## HUMAN IL17RB PROTEIN, HIS TAG

货号: 11255

产品全名: 人 IL17RB 蛋白

规格: 10/50/100 µg

基因符号 Interleukin-17 receptor B;L-17 receptor B;L-17RB;ytokine receptor-like 4;L-17Rh1;L17Rh1;L-17B receptor

目标蛋白: IL17RB

**UNIPROT ID:** Q9NRM6

**描述:** Recombinant human IL17RB protein with C-terminal 6xHis tag

**背景:** The protein encoded by this gene is a cytokine receptor. This receptor specifically binds to IL17B and IL17E, but does not bind to IL17 and IL17C. This receptor has been shown to mediate the activation of NF-kappaB and the production of IL8 induced by IL17E. The expression of the rat counterpart of this gene was found to be significantly up-regulated during intestinal inflammation, which suggested the immunoregulatory activity of this receptor. [provided by RefSeq, Jul 2008]

**物种/宿主:** HEK293

**分子量:** The protein has a predicted molecular mass of 30.7 kDa after removal of the signal peptide. The apparent molecular mass of TEM1 -His is approximately 35-55 kDa due to glycosylation.

**分子特征:** IL17RB(Arg18-Gly288) 6xHis tag

**纯化:** The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining.

**Formulation & Reconstitution:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization.

**储存和运输:** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
