

HUMAN IL4RA PROTEIN, MFC TAG

货号: 11351

产品全名: 人 IL4RA 蛋白

规格: 10/50/100 μ g

基因符号 CD124;IL-4RA;IL4RA

目标蛋白: IL4RA

UNIPROT ID: P24394

描述: Recombinant Human IL4RA with C-terminal mouse Fc tag

背景: This gene encodes the alpha chain of the interleukin-4 receptor, a type I transmembrane protein that can bind interleukin 4 and interleukin 13 to regulate IgE production. The encoded protein also can bind interleukin 4 to promote differentiation of Th2 cells. A soluble form of the encoded protein can be produced by proteolysis of the membrane-bound protein, and this soluble form can inhibit IL4-mediated cell proliferation and IL5 upregulation by T-cells. Allelic variations in this gene have been associated with atopy, a condition that can manifest itself as allergic rhinitis, sinusitis, asthma, or eczema. Polymorphisms in this gene are also associated with resistance to human immunodeficiency virus type-1 infection. Alternate splicing results in multiple transcript variants.

物种/宿主: HEK293

分子量: The protein has a predicted molecular mass of 49.8 kDa after removal of the signal peptide. The apparent molecular mass of IL4RA-mFc is approximately 70-100 kDa due to glycosylation.

分子特征: IL4RA(Met26-His232) mFc(Pro99-Lys330)

纯化: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization.

储存和运输: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
