

HUMAN LGALS3 PROTEIN, HIS TAG

货号: 11701

产品全名: 人 LGALS3 蛋白

规格: 10/50/100 µg

基因符号 CBP35;GAL3;GALBP;GALIG;L31;LGALS2;MAC2

目标蛋白: LGALS3

UNIPROT ID: P17931

描述: Recombinant Human LGALS3 Protein with C-terminal 6xHis tag

背景: This gene encodes a member of the galectin family of carbohydrate binding proteins. Members of this protein family have an affinity for beta-galactosides. The encoded protein is characterized by an N-terminal proline-rich tandem repeat domain and a single C-terminal carbohydrate recognition domain. This protein can self-associate through the N-terminal domain allowing it to bind to multivalent saccharide ligands. This protein localizes to the extracellular matrix, the cytoplasm and the nucleus. This protein plays a role in numerous cellular functions including apoptosis, innate immunity, cell adhesion and T-cell regulation. The protein exhibits antimicrobial activity against bacteria and fungi. Alternate splicing results in multiple transcript variants.[provided by RefSeq, Oct 2014]

物种/宿主: HEK293

分子量: The protein has a predicted molecular mass of 26.9 kDa after removal of the signal peptide. The apparent molecular mass of LGALS3-His is approximately 25-35 kDa due to glycosylation.

分子特征: LGALS3(Ala2-Ile250) 6xHis Tag

纯化: The purity of the protein is greater than 90% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

储存和运输: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
