HUMAN TIGIT PROTEIN, MFC TAG

目录: 11308
产品名称: Human TIGIT Protein
规格: 10 μg, 50 μg and 100 μg
基因符号: TIGIT;SIG9;STM3
Target: TIGIT
UNIPROT ID: Q495A1
描述: Recombinant human TIGIT Protein with C-terminal mouse Fc tag
背景: This gene encodes a member of the PVR (poliovirus receptor) family of immunoglobin proteins. The product of this gene is expressed on several classes of T cells including follicular B helper T cells (TFH). The protein has been shown to bind PVR with high affinity, this binding is thought to assist interactions between TFH and dendritic cells to regulate T cell dependent B cell responses.
Species/Host: HEK293
Molecular Weight: The protein has a predicted molecular mass of 39.24 kDa after removal of the signal peptide.The apparent molecular mass of TIGIT-mFc is approximately 40-53 kDa due to glycosylation.
Molecular Characterization: TIGIT(Met22-Pro141) mFc(Pro99-Lys330)
纯化:: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.
Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.
储存和运输: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

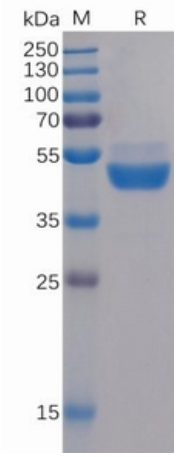

Figure 1. Human TIGIT Protein, mFc Tag on SDS-PAGE under reducing condition.

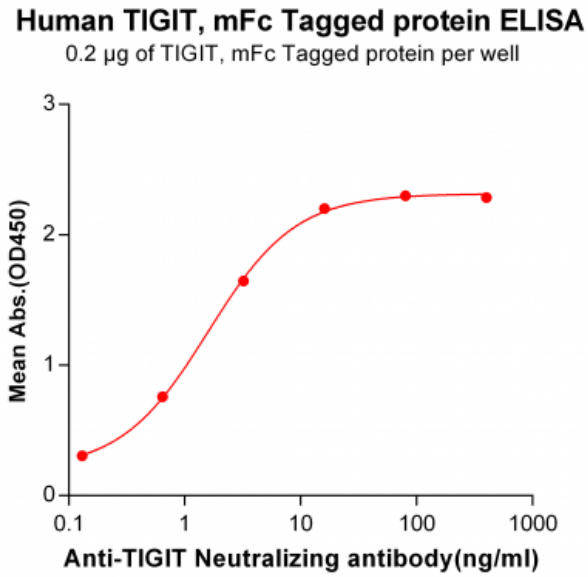

Figure 2. ELISA plate pre-coated by 2 μg/ml (100 μl/well) Human TIGIT, mFc tagged protein (11308) can bind TIGIT Neutralizing antibody 28033 in a linear range of 0.13-16.0 ng/ml.
