基因符号: C-Kit; CD117; KIT; PBT; SCFR

描述: KIT(K642E) 小鼠单克隆抗体

背景: Tyrosine-protein kinase Kit, also known as proto-oncogene c-Kit or CD117 or Mast/stem cell growth factor receptor (SCFR), is a receptor tyrosine kinase protein that in humans is encoded by the KIT gene. Activating mutations in this gene are associated with gastrointestinal stromal tumors, testicular seminoma, mast cell disease, melanoma, acute myeloid leukemia, while inactivating mutations are associated with the genetic defect piebaldism.

免疫原: A synthetic peptide from the internal region of KIT which includes the mutation of K642E, human origin.
