

## ANTI-MOUSE IGG1 FC NANOBODY

### Mouse IgG1 Nanobody

货号: 26403

规格: 100  $\mu$ L

**Target:** IgG1

**描述:** Mouse IgG1 Nanobody

**背景:** Mouse IgG1 FC refers to the Fc fragment of mouse IgG1, and Mouse IgG1 Fc nanobody specifically recognizes and binds to the Fc fragment of mouse IgG1. This kind of nanobody has the advantages of small molecular weight, high stability, and easy modification. It can achieve efficient and specific recognition and binding of target molecules, and is suitable for all immune reactions in which the primary antibody is a mouse antibody.

**经过测试的应用:** FACS, Elisa, IP, Co-IP, IHC

**Dilution:** 1:500

**Molecular Weight:** 15 kD

**形式:** Liquid

**克隆性:** Monoclonal

**Tag:** His, Myc

**成分:** PBS, 40% Glycerol, 0.03% proclin300

**Species:** Mouse

**储存条件:** Store at 4 $^{\circ}$ C, 6 months; -20 $^{\circ}$ C, 2 years

**ELISA** Mouse IgG1 Fc antibody at 1/500 dilution:
