

## MOUSE TIM3 PROTEIN, HFC TAG

货号: 12172

产品全名: Mouse TIM3 蛋白

规格: 10/50/100 µg

基因符号 HAVCR2;TIMD3;FLJ14428;KIM3

目标蛋白: TIM3

**UNIPROT ID:** Q8VIM0

**描述:** Recombinant mouse TIM3 protein with C-terminal human Fc tag

**背景:** The protein encoded by this gene belongs to the immunoglobulin superfamily, and TIM family of proteins. CD4-positive T helper lymphocytes can be divided into types 1 (Th1) and 2 (Th2) on the basis of their cytokine secretion patterns. Th1 cells are involved in cell-mediated immunity to intracellular pathogens and delayed-type hypersensitivity reactions, whereas, Th2 cells are involved in the control of extracellular helminthic infections and the promotion of atopic and allergic diseases. This protein is a Th1-specific cell surface protein that regulates macrophage activation, and inhibits Th1-mediated auto- and alloimmune responses, and promotes immunological tolerance. [provided by RefSeq, Sep 2011]

**物种/宿主:** HEK293

**分子量:** The protein has a predicted molecular mass of 45.4 kDa after removal of the signal peptide. The apparent molecular mass of mTIM3-hFc is approximately 55-70 kDa due to glycosylation.

**分子特征:** Mouse TIM3(Arg20-Thr192) hFc(Glu99-Ala330)

**纯化:** The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

**Formulation & Reconstitution:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

**储存和运输:** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
