

RAC3 MAB

产品名称: Rac3 小鼠单抗

货号: 26064

基因符号: RAC3

描述: Rac3 小鼠单抗

背景: Rac3 is a small GTPase of the Rho family that relays signals through direct interaction of GTP-bound Rac3 with downstream effector molecules. The Rac subfamily consists of Rac1, Rac2, and Rac3 proteins. While Rac1 is ubiquitously expressed, Rac2 and Rac3 are largely restricted to hematopoietic and neural tissues, respectively. Rac3 has biochemical properties that are closely related to Rac1. Both Rac1 and Rac3 have been implicated in the regulation of cell migration and invasion in human metastatic cancer.

免疫原: A synthetic peptide near the C-terminus of human Rac3.
