

HUMAN TSPAN8 FULL LENGTH PROTEIN

货号: 11069

产品全名: 人 TSPAN8 Full Length 蛋白

规格: 10/50/100 µg

基因符号 CO-029; TM4SF3

目标蛋白: TSPAN8

UNIPROT ID: P19075

描述: 人 TSPAN8 full length protein-synthetic nanodisc

背景: The protein is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded protein is a cell surface glycoprotein that is known to complex with integrins. This gene is expressed in different carcinomas.

物种/宿主: HEK293

分子量: The human full length TSPAN8 protein has a MW of 26.0 kDa

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

储存和运输: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
